

Food Testing Services

LABORATORY
TESTING

We deliver accurate results and industry-specific solutions to help our partners uphold what Aotearoa stands for in food – a higher standard of quality and safety.

Our laboratory facilities are ISO/IEC 17025 accredited, with government and customer approvals providing microbiology and chemistry testing services. We offer a comprehensive range of analyses for food manufacturers ranging from raw materials through to finished products. With laboratories across New Zealand as well as a network of laboratories in Australia and Southeast Asia, we offer an unparalleled range of testing capabilities for our partners.

Our food testing services include:

- Food safety – for microorganisms
- Product integrity and spoilage
- Food composition, nutrition, stability, label claims
- Food contaminants and adulterants
- Pharmaceuticals and nutraceuticals
- Shelf life
- Allergens
- Technical support and consultation
- And more

Our web-based system, LabConnect, delivers a fast and transparent customer experience with secure access to results in real time – 24 hours a day, seven days a week, from sample reception through to completion.
