

# Seed Industry Services

INSPECTION AND  
CERTIFICATION

Aotearoa has a reputation as a premier producer and exporter of seed. People in this industry work hard to maintain this reputation and we are very proud to serve them through our full spectrum of services.

As the leading provider of testing, inspection, certification and verification services to the Australasian seed and grain industry, we provide a complete service for growers and merchants. We have a deep responsibility to do the right thing and support our partners through services in the field and in our specialist laboratories where we focus on delivering accurate results through method validation and statistical integrity.

**Our services include:**

- Seed identification
- Seed health testing
- Seed pathology and nematology
- Endophyte testing
- Export certification testing
- Purity testing
- Germination testing
- Moisture testing
- Tetrazolium testing
- Certification services
- Seed Crop Isolation Distance system (SCID)
- AsureQuality Organic Certification
- Assurance Marks – supply chain transparency or specific claim certification
- Industry training to upskill your team including Seed Sampling and Phytosanitary Inspector Training, HACCP, Auditing and more
- Vigour testing
- 1000 seed weight testing
