

Acceptable Livestock Health Products – USDA NOP

- This list includes products that may be used by organic livestock producers certified to regulated export markets, including the USDA National Organic Program (NOP).
- All products must be included in the Organic Management Plan and approved by AsureQuality **BEFORE** use.
- For emergency treatments the listing in the Organic Management Plan is a contingency plan, so notification of use is required using an Emergency Treatment form.
- ACVM products can be viewed at <https://eatsafe.nzfsa.govt.nz/web/public/acvm-register> by entering in the applicable ACVM registration number listed below.

Product Type	ACVM No	Product Brand Name	Active ingredient(s)	Supplier	Status	Conditions Specific to USDA NOP as per 7 CFR 205.603
Local Anaesthetic	A005419	Lopaine 2%	Lignocaine/ Lidocaine	Ethical Agents Veterinary Marketing Ltd	Restricted	Only an approved form may be used as is listed on the AQ "Acceptable Livestock Health Products" list. Approved for use for animal welfare. Use requires a withdrawal period of 8 days after administering to livestock intended for slaughter and 6 days after administering to dairy animals. Records of use must be maintained for five years as per USDA NOP requirements. 205.603(b)(4) Revision Date: 4Apr19
Local Anaesthetic	A006597	Nopaine 2%	Lignocaine/ Lidocaine	Phoenix Pharm Distributors Ltd	Restricted	Only an approved form may be used as is listed on the AQ "Acceptable Livestock Health Products" list. Approved for use for animal welfare. Use requires a withdrawal period of 8 days after administering to livestock intended for slaughter and 6 days after administering to dairy animals. Records of use must be maintained for five years as per USDA NOP requirements. 205.603(b)(4) Revision Date: 4Apr19
Local Anaesthetic	A006498	Bomacaine	Lignocaine/ Lidocaine	Bayer NZ Ltd	Restricted	Only an approved form may be used as is listed on the AQ "Acceptable Livestock Health Products" list. Approved for use for animal welfare. Use requires a withdrawal period of 8 days after administering to livestock intended for slaughter and 6 days after administering to dairy animals. Records of use must be maintained for five years as per USDA NOP requirements. 205.603(b)(4) Revision Date: 4Apr19
Sedative / Analgesic	A005541	Phoenix Xylazine 2% Injection	Xylazine	Phoenix Pharm Distributors Ltd	Restricted	RESTRICTED: Approved for use for animal welfare. Meat withholding period at least 8 days, milk discard period at least 4 days. Records of use must be maintained for five years as per USDA NOP requirements.

Product Type	ACVM No	Product Brand Name	Active ingredient(s)	Supplier	Status	Conditions Specific to USDA NOP as per 7 CFR 205.603
Sedative / Analgesic	A006540	Phoenix Xylazine 5% Injection	Xylazine	Phoenix Pharm Distributors Ltd	Restricted	RESTRICTED: Approved for use for animal welfare. Meat withholding period at least 8 days, milk discard period at least 4 days. Records of use must be maintained for five years as per USDA NOP requirements.
Sedative / Analgesic	A006583	Phoenix Xylazine 10% Injection	Xylazine	Phoenix Pharm Distributors Ltd	Restricted	RESTRICTED: Approved for use for animal welfare. Meat withholding period at least 8 days, milk discard period at least 4 days. Records of use must be maintained for five years as per USDA NOP requirements.
Sedative / Analgesic	A007422	Anased 2% Injection	Xylazine	Lloyd Laboratories NZ Ltd	Restricted	RESTRICTED: Approved for use for animal welfare. Meat withholding period at least 8 days, milk discard period at least 4 days. Records of use must be maintained for five years as per USDA NOP requirements.
Sedative / Analgesic	A007421	Anased 10% Injection (deer)	Xylazine	Lloyd Laboratories NZ Ltd	Restricted	RESTRICTED: Approved for use for animal welfare. Meat withholding period at least 8 days, milk discard period at least 4 days. Records of use must be maintained for five years as per USDA NOP requirements.
Xylazine reversant	A006810	Tolazine Injection	Tolazoline	Lloyd Laboratories NZ Ltd	Restricted	RESTRICTED: For use only to reverse the effects of sedation and analgesia caused by Xylazine. Use requires a withholding period of at least 8 days after administering to livestock intended for slaughter, and at least 4 days milk withholding for dairy stock. Records of use must be maintained for five years as per USDA NOP requirements.
Anti-inflammatory	A007861	Flunixin Injection	Flunixin	Norbrook NZ Ltd	Restricted	RESTRICTED: Approved for use for animal welfare. Withholding period at least twice the time stated on drug label. Records of use must be maintained for five years as per USDA NOP requirements.
Antimicrobial	A004002	Iodine Tincture Spray	Iodine	Ethical Agents Veterinary Marketing Ltd	Restricted	RESTRICTED: For use as a topical treatment. Records of purchase and use must be maintained for five years as per USDA NOP requirements.

Product Type	ACVM No	Product Brand Name	Active ingredient(s)	Supplier	Status	Conditions Specific to USDA NOP as per 7 CFR 205.603
Antimicrobial	A003320	Vetadine PVP Iodine Spray	Iodine	Bayer NZ Ltd	Restricted	RESTRICTED: For use as a topical treatment. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Antimicrobial	N/A	FIL Stock Iodine 2.5%	Iodine	FIL NZ	Restricted	RESTRICTED: For use as a topical treatment. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Antimicrobial/ Teat Sanitiser	A009355	DeLaval Spray & Dip RTU	Iodine	DeLaval Ltd	Restricted	RESTRICTED: For use as an external teat sanitiser to help keep somatic cell counts at an acceptable level, and as a topical disinfectant. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Antimicrobial/ Teat Sanitiser	A009057	KontACT RTU Advanced	Iodine	DeLaval Ltd	Restricted	RESTRICTED: For use as an external teat sanitiser to help keep somatic cell counts at an acceptable level, and as a topical disinfectant. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Antimicrobial/ Teat Sanitiser	A007271	KontACT (Concentrate)	Iodine	DeLaval Ltd	Restricted	RESTRICTED: For use as an external teat sanitiser to help keep somatic cell counts at an acceptable level, and as a topical disinfectant. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Antimicrobial/ Teat Sanitiser	A003617	Teat Guard 2	Iodine	Ecolab NZ	Restricted	RESTRICTED: For use as an external teat sanitiser to help keep somatic cell counts at an acceptable level, and as a topical disinfectant. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Antimicrobial/ Teat Sanitiser	A011222	Hibitane2	Glycerine, chlorhexidine	Ecolab NZ	Restricted	RESTRICTED: For use as a teat sanitiser when alternative germicidal agents and/or physical barriers have lost their effectiveness. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Teat conditioner	N/A	Shine (Elthamol) Glycerine	Glycerine	Bell-Booth Ltd	Restricted	RESTRICTED: For use as an external teat dip. Records of purchase and use must be maintained for five years as per USDA NOP requirements.

Product Type	ACVM No	Product Brand Name	Active ingredient(s)	Supplier	Status	Conditions Specific to USDA NOP as per 7 CFR 205.603
Udder conditioner	N/A	Udder Comfort - Yellow Spray	Essential oils	Shoof International Ltd	Restricted	RESTRICTED: For use as an external udder treatment on the basis that it is a natural product. Records of purchase and use must be maintained for five years as per USDA NOP requirements. NB: other forms of Udder Comfort are not approved.
Udder conditioner	N/A	Udder Treat-Mint	Essential oils	Wharb Ltd	Restricted	RESTRICTED: For use as an external udder treatment on the basis that it is a natural product. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Bloat treatment	A003375	Bloatenz 2 in 1	Poloxalene	Ecolab NZ	Restricted	RESTRICTED: For emergency treatment of bloat only. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Endoparasiticide	A007392	Ivomec Injection for cattle, sheep and pigs	Ivermectin	Merial NZ Ltd	Restricted Prohibited in slaughter stock	From 27th December 2019 this product will be PROHIBITED for USDA NOP. RESTRICTED: For emergency treatment of dairy and breeder stock only, prohibited in slaughter stock . Milk or milk products from a treated animal must not be sold as organic for 90 days after product use. In breeder stock, treatment cannot occur during the last third of gestation if the progeny is to be sold as organic and must not be used during the lactation period for breeder stock. Approval is subject to evidence of a problem (e.g. faecal egg count) or vet recommendation. Number of treatments and records as per AQ Standard. Notify use by submitting completed Emergency Treatment form.
Endoparasiticide	A008032	Noromectin Pour-On for Cattle and Deer	Ivermectin	Norbrook NZ Ltd	Restricted Prohibited in slaughter stock	From 27th December 2019 this product will be PROHIBITED for USDA NOP. RESTRICTED: For emergency treatment of dairy and breeder stock only, prohibited in slaughter stock . Milk or milk products from a treated animal must not be sold as organic for 90 days after product use. In breeder stock, treatment cannot occur during the last third of gestation if the progeny is to be sold as organic and must not be used during the lactation period for breeder stock. Approval is subject to evidence of a problem (e.g. faecal egg count) or vet recommendation. Records of purchase

			Magnesium hypophosphite			
Electrolyte - Injectable	A004047	Calpro 375	Calcium borogluconate, Vitamin B12	Bayer NZ Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Injectable	A007111	Calpromag	Calcium borogluconate, Magnesium chloride, Vitamin B12	Bayer NZ Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Injectable	A009674	Dextron	Glucose	Landmark Operations (NZ) Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Injectable	A009719	VetDEX	Glucose	Landmark Operations (NZ) Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Injectable	A001450	Dextrose 40%	Dextrose	Bayer NZ Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Injectable	A001448	Magnesium sulphate 20%	Magnesium sulphate	Bayer NZ Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Oral	A003230	Trolyte	Potassium chloride, Sodium bicarbonate, Disodium hydrogen phosphate, Sodium chloride	Ethical Agents Veterinary Marketing Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.

Product Type	ACVM No	Product Brand Name	Active ingredient(s)	Supplier	Status	Conditions Specific to USDA NOP as per 7 CFR 205.603
Electrolyte - Oral	A001625	Dexolyte	Dextrose, Sodium chloride, Potassium chloride, Vitamin A	Bayer NZ Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Oral	A009642	Oral Max	Magnesium chloride, Calcium chloride, Propylene glycol	Bayer NZ Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Electrolyte - Oral	A007669	Oral-Cal	Calcium chloride	Bayer NZ Ltd	Restricted	RESTRICTED: For administration in emergency situations as recommended by a vet. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Feed additive	N/A	Trubond	Bentonite (montmorillonite)	Sibelco	Restricted	RESTRICTED: For use as a feed additive or to assist treatment of calf scours. Not to exceed 2% of total ration. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Feed additive	N/A	Diatomaceous Earth	Diatomaceous Earth	Probitas Systems NZ Ltd	Restricted	RESTRICTED: For use as a feed additive or to assist treatment of calf scours. Not to exceed 2% of total ration. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Hormone	A007289	Oxytocin V	Oxytocin	Vetpharm (NZ) Ltd	Restricted	RESTRICTED: For use in post parturition treatment, no routine or long term use. Records of use must be maintained for five years as per USDA NOP requirements.
Hormone	A001370	Butocin	Oxytocin	Bayer NZ Ltd	Restricted	RESTRICTED: For use in post parturition treatment, no routine or long term use. Records of use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A005908	Hideject	Vitamin A, D ₃ , E	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.

Product Type	ACVM No	Product Brand Name	Active ingredient(s)	Supplier	Status	Conditions Specific to USDA NOP as per 7 CFR 205.603
Nutrient / electrolyte	A006357	Vijec Vitamin B12 Injection	Vitamin B12	Ethical Agents Veterinary Marketing Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A007255	Vijec Vitamin B12 2000 Injection with Selenium	Vitamin B12, Sodium selenate	Ethical Agents Veterinary Marketing Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A002017	Prolaject B12	Vitamin B12	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A005850	Prolaject B12 1000 for Sheep and Cattle	Vitamin B12	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A006536	Prolaject B12 2000 for Sheep and Cattle	Vitamin B12	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A006170	Prolaject B12 1000 Plus Selenium for	Vitamin B12, Sodium selenate	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing

Product Type	ACVM No	Product Brand Name	Active ingredient(s)	Supplier	Status	Conditions Specific to USDA NOP as per 7 CFR 205.603
		Sheep and Cattle				deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A006903	Prolaject B12 2000 Plus Selenium for Sheep and Cattle	Vitamin B12, Sodium selenate	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A007397	Cobalject 1000	Vitamin B12	Horizon Agresources (NZ) Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A007399	Cobalject 2000	Vitamin B12	Horizon Agresources (NZ) Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A007398	Cobalject 1000 Plus Selenium	Vitamin B12, Sodium selenate	Horizon Agresources (NZ) Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A007400	Cobalject 2000 Plus Selenium	Vitamin B12, Sodium selenate	Horizon Agresources (NZ) Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.

Product Type	ACVM No	Product Brand Name	Active ingredient(s)	Supplier	Status	Conditions Specific to USDA NOP as per 7 CFR 205.603
						requirements.
Nutrient / electrolyte	A009876	Elevate B12 1000 for Sheep and Cattle	Vitamin B12	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A009884	Elevate B12 2000 for Sheep and Cattle	Vitamin B12	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A009885	Elevate B12 1000 Plus Selenium for Sheep and Cattle	Vitamin B12, Sodium selenate	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A009883	Elevate B12 2000 Plus Selenium for Sheep and Cattle	Vitamin B12, Sodium selenate	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A007040	Selpor	Sodium selenate	Merial NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.

Product Type	ACVM No	Product Brand Name	Active ingredient(s)	Supplier	Status	Conditions Specific to USDA NOP as per 7 CFR 205.603
Nutrient / electrolyte	A006139	Selovin-5	Sodium selenate	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A010198	Face-Guard 90-250 kg	Zinc	Bayer NZ Ltd	Restricted	RESTRICTED: For use as an antidote to limit damage from facial eczma toxins. Requires evidence of high spore counts in the area, or vet recommendation. May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A010744	Face-Guard 251-660 kg	Zinc	Bayer NZ Ltd	Restricted	RESTRICTED: For use as an antidote to limit damage from facial eczma toxins. Requires evidence of high spore counts in the area, or vet recommendation. May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A009773	Face-Guard Sheep	Zinc	Bayer NZ Ltd		RESTRICTED: For use as an antidote to limit damage from facial eczma toxins. Requires evidence of high spore counts in the area, or vet recommendation. May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Nutrient / electrolyte	A009469	Coppermax	Calcium copper edetate	Bayer NZ Ltd	Restricted	RESTRICTED: For use in affected livestock only, subject to vet recommendation and evidence of a problem (e.g. tests showing deficiency). May only be used when preventative practices and veterinary biologics are inadequate. Records of purchase and use must be maintained for five years as per USDA NOP requirements.
Vaccine	A010856	Startvac	E coli, Staph aureus	Hipra NZ Ltd	Restricted	RESTRICTED: Usage based on prevalence of the disease in the geographical area and unable to be controlled by other
