Sampling

- Submit up to 10 leaves per clean/new plastic bag, making sure not to cross contaminate sub samples.
- Leaf samples should be kept cool at all times. Courier in chilly bin with ice pack. Separate samples from ice pack to avoid frost damage to samples.
 - Tubers will be sprouted until suitable leaves have developed for tests. This may take several months.
 - For sample sizes for export, consult the Importing Country Phytosanitary Requirements (ICPRs)
 - Meristem plantlets are grown-on in a green house and each plantlet will be tested individually.
 - Courier samples with this completed form to: **AsureQuality Plant Health Lab** (att. Rouke Bakker)
**South Drive
 Lincoln University
 Lincoln 7674**
